Report of Teachers Feedback (2024-2025)

Most of the feedbacks are found to be in very good to excellent range

Teachers Comments

1. Reframing of syllabus is required More practical are incorporated to make student industry ready
2. Include some interactive teaching methods and skill like communications, digital thinking. Overall good. Thanks
3. 1. Incorporate more industry-relevant modules, such as recent regulatory updates, pharmaceutical data analytics, pharmacovigilance, and clinical research practices. 2. Introduce hands-on skill development workshops and simulation-based learning, especially in pharmaceuticals, pharmacology, and quality assurance. 3. Increase the number of practical hours and include case-based lab experiments to bridge the gap between theory and real-world applications
4. There must be inclusion of Practical for certain subjects so the students will improve the skill
5. Curriculum should be reviewed more frequently (ideally every 2–3 years).
6. The institution offers a positive learning environment with supportive faculty and well-maintained facilities. Academic and co-curricular activities foster students' overall development. For final-year B. Pharm students, more industry-related workshops and practical exposure would significantly improve their professional readiness."

Action Taken

Teacher's comment was observed after the feedback was analyzed and these comments are communicated to IQAC
